REFERENCE LIST

Ferro Keš was founded in 2001. with headquarters in Mostar, Bosnia and Herzegovina.
Until today, the company has grown into a market leader with annual sales of over 40,000,000.00 €.

The primary activities of the manufacturing plant Ferro Keš are:

- **Production of steel wire mesh**
- **Processing of reinforcement steel (cutting, bending, sizing and positioning on the draft specification)**
- **Production of points for piles (with or without steel pipe)**
- **Production of tunnel belts**
- **Production and installation of steel structures**
- **Production and installation of structural steel used in highway equipping**

Annual production capacity of **over 40,000.00 t** of rebar and mesh, and **over 30,000.00 t** of bent and cut iron, ready for installation.
The strength of our company is highly professional and educated staff and skilled workers who with the help of the latest technologies ensure competitiveness and recognition of our company in the European market.
One of our competitive advantages in the market is our motor fleet which consists of over 20 trucks which ensure timely delivery of products to help our customers to build faster and high-quality.
Ferro Keš operates according to European standards and has **ISO 9001** certificate standard.
Wire mesh are certified in accordance with European standards **EN10080/2005**, quality **B500A** and have the certificate of constancy of capacity which was released by the INSTITUTE “IGH” under number **1/05-ZGP-1724**.

In addition to standard steel wire mesh, we also produce reinforcing mesh of specific dimensions and profiles to the satisfaction of our customers.
Thanks to modern automatic and semi-automatic machines the company is able to provide fast and efficient delivery of our products according to customers projects as well to make reinforcement baskets and tunnel belts of all dimensions by European standards.

Dependable and durable solutions in the field of road safety are characteristic of our product line. In cooperation with our partners we have become an organization which is able to respond to the demands of our customers at any time quickly and efficiently while respecting all standards and safety regulations.

Our work is known and recognized by many completed and ongoing projects such as:
